PROFESSIONAL SUMMARY

Full Stack developer with professional experience and knowledge of many frontend and backend frameworks, responsive frameworks, databases, and best code practices. The objective is simply to create and maintain applications that are useful and contribute to the technology industry in an impactful way. An understanding of problem solving and complex algorithms are also skills that have and will contribute to my overall success as a developer.

SKILLS

- Front End languages: HTML, CSS, JavaScript
- Frameworks: React, Angular, Jest.js, jQuery, Bootstrap and Materialize
- Back End languages: JavaScript, Ruby on Rails, Python, Java, Shell
- Databases: SQL, MongoDB, IndexedDB, DynamoDB, S3
- Version control and Project Management: Github
- Server-side: Node.js, AWS EC2/ECR
- Methodologies: MVC design pattern, Agile, UML and TDD
- Knowledge of: Docker, AWS products, server monitoring, Terraform, Redux, GraphQL, Firebase, PWAs, and debugging tools.
- Confidentiality
- Thoroughness
- Excellent attention to detail
- Ability to multitask effectively
- Strong written and verbal communication skills
- Comfortable working independently with minimal supervision

PROJECTS

Follow My Fitness

- Link to live site: <https://follow-my-fitness.herokuapp.com/>
- Link to github: <https://github.com/carpegavin/Follow-My-Fitness>

Follow my Fitness is a fitness application where users log and share workouts as well as BMI and fitness goals. The application uses materialize and handlebars as front end frameworks to style the page and render template data. The server was created using Node.js and JavaScript. User data is populated to our mySQL database using the sequelize npm package.

Wepoo

- Link to live site: <https://wepoo-app.herokuapp.com/>
- Link to github: <https://github.com/carpegavin/WePoo>

Wepoo is a React PWA that can be downloaded to the home screen of your phone, to locate, rate and review local public bathrooms. The app uses google maps api and google places api to populate our map. The reviews are saved to a mongoDB database. The server is built with Express and Node.js

Team Profile Generator (Command Line Interface)

- Link to github: <https://github.com/Devante05/TeamProfile-Generator>

Team Profile Generator is a CLI where the user can input any number of team members, and they may be a mix of engineers and interns. The user will input Position, Name, ID, email, and office number for each employee. When the user has completed building the team, the application will create an HTML file that displays a nicely formatted team roster based on the information provided by the user. This is possible by leveraging the node npm package “inquirer” to create a command line interface that will retrieve the team information from the user.

WORK EXPERIENCE

Gerson Lehrman Group, 301 Congress Ave #1500, Austin, TX 78701

ConOps Software Engineer

- Develops frontend and backend software solutions for backlog of features and improvements.
- Manage and solve tickets related to application bugs and errors with ideal software solutions.
- CI/CD tooling and implementation
- Knowledge of AWS Cloud environments and tools.
- An understanding of Git and the importance of version control systems
- Familiarity with container orchestration systems and microservices
- Experience with server and/or application monitoring systems
- Knowledge about configuration management and server automation
- Develops software solutions by studying internal needs, conferring with users, and studying systems flow, data usage, and work processes.
- Prepare and beta solutions by determining and designing system specifications, standards, and programming.
- Provides information by collecting, analyzing, and summarizing development and service issues.

EDUCATION

Southern Methodist University 5539 SMU Boulevard, Dallas, TX 75206

— Java , React-Native Certification

University of Texas at Austin, 101 East 21st St, Austin, TX 78712

— Fullstack Web Developer certificate

Pflugerville High School, 1301 W Pecan St, Pflugerville, TX 78660

— High School Diploma
